TELEHEALTH / CLINICAL OPERATIONS DISCLAIMER

Updated: June 26, 2026

Company	BAGS Estate & Holdings LLC DBA Enhanced Bioscience Consulting
Website	www.enhancedbioscience.consulting
Contact	info@enhancedbioscience.consulting
Scope	Business, administrative, patient engagement, provider acquisition, technology coordination, and non-clinical support services.

This Telehealth / Clinical Operations Disclaimer explains the limited, non-clinical role of Enhanced Bioscience Consulting in connection with any telehealth, provider review, patient engagement, prescription routing, pharmacy fulfillment, or healthcare technology workflows that may involve third-party platforms, licensed healthcare professionals, pharmacies, vendors, or other regulated parties.

1. Separation of Enhanced Bioscience Consulting from Clinical Operations

Enhanced Bioscience Consulting is a business consulting, administrative support, technology coordination, patient engagement, provider acquisition, and operational infrastructure company. Enhanced Bioscience Consulting is separate from any licensed medical practice, telehealth clinical entity, pharmacy, prescribing provider, or prescription fulfillment platform unless a separate written agreement states otherwise. Enhanced Bioscience Consulting does not independently operate as a medical practice, pharmacy, compounding pharmacy, prescription fulfillment center, or licensed healthcare provider.

2. No Medical Advice by Enhanced Bioscience Consulting

Website content, marketing materials, intake coordination, scheduling support, educational materials, administrative communications, and business workflows provided by Enhanced Bioscience Consulting are for general informational, administrative, and operational purposes only. They are not medical advice and are not intended to diagnose, treat, cure, prevent, or manage any disease, condition, symptom, injury, or health concern.

3. No Doctor-Patient Relationship with Enhanced Bioscience Consulting

**ENHANCED
BIOSCIENCE**
— CONSULTING —
SCIENCE. STRATEGY. RESULTS.

A doctor-patient relationship is not created by visiting an Enhanced Bioscience Consulting website, submitting a form, speaking with administrative staff, receiving marketing information, scheduling a consultation, completing intake materials, or receiving non-clinical support communications. A provider-patient relationship, if any, may only be formed through an appropriate clinical process with a licensed healthcare professional who accepts responsibility for care under applicable law.

4. Licensed Provider Responsibility

All medical decisions, diagnoses, treatment recommendations, prescriptions, medication changes, clinical notes, patient eligibility determinations, referrals, and follow-up recommendations must be made by properly licensed healthcare professionals acting within their scope of practice and applicable state and federal law. Enhanced Bioscience Consulting does not direct clinical judgment, approve prescriptions, override provider decisions, or determine medical necessity.

5. Telehealth Limitations

Telehealth may not be appropriate for all patients, conditions, medications, services, emergencies, or jurisdictions. Licensed providers may require additional information, identity verification, medical records, laboratory testing, an in-person evaluation, referral to another provider, or discontinuation of telehealth if clinically appropriate. Availability may vary by state, provider licensure, service line, technology availability, and legal requirements.

6. Prescription and Fulfillment Disclaimer

Completing an intake form, requesting a consultation, making payment, or participating in a telehealth workflow does not guarantee a prescription, treatment approval, pharmacy acceptance, shipment, refill, or delivery. Prescriptions may be issued only by licensed healthcare professionals after appropriate clinical review and only when clinically appropriate and legally permitted. Pharmacies and fulfillment partners may decline, delay, cancel, substitute, or require additional information according to applicable law, inventory, payer rules, pharmacy policies, safety requirements, or provider instructions.

7. Third-Party Platforms and Prescribe-Rx Infrastructure

Enhanced Bioscience Consulting may coordinate with third-party technology platforms, telehealth infrastructure providers, e-prescribing systems, pharmacy management tools, scheduling tools, video platforms, CRM systems, support systems, payment processors, analytics providers, and related vendors. Those third parties operate under their own terms, privacy policies, security practices, compliance obligations, and professional responsibilities. Enhanced Bioscience Consulting is not responsible for third-party clinical decisions, platform outages, pharmacy determinations, shipping delays, vendor errors, or independent third-party policies except as expressly stated in a signed written agreement.

8. Patient Information, Intake Accuracy, and Consent

Patients and users are responsible for providing accurate, complete, and current information, including identity details, state/location, medical history, medications, allergies, symptoms, contraindications, pharmacy information, shipping information, and emergency contact information where requested. False, incomplete, or outdated information may delay review, affect eligibility, result in denial of services, or create health and safety risks. Patients should read and understand all consent forms, privacy notices, telehealth disclosures, payment terms, refund policies, and medication safety information before proceeding.

9. Privacy, PHI, and Communications

Where protected health information or sensitive personal information is involved, applicable privacy, security, HIPAA, state privacy, vendor, and data sharing requirements should be addressed through appropriate safeguards and written agreements. SMS, email, and standard communication tools may have privacy limitations. Users should not send urgent medical information, emergency information, or unnecessary sensitive health details through unsecured channels.

10. Emergency and Urgent Care

Enhanced Bioscience Consulting websites, forms, portals, support channels, SMS, email, and telehealth coordination workflows are not intended for emergencies or urgent medical needs. If you believe you may be experiencing a medical emergency, call 911 or seek immediate medical attention. Do not wait for a response from a website form, email, text message, call center, provider portal, or support ticket.

11. No Guarantees

Enhanced Bioscience Consulting does not guarantee medical outcomes, patient results, provider approval, treatment eligibility, prescription issuance, pharmacy acceptance, product availability, delivery timing, business performance, patient acquisition results, revenue, conversion rates, or retention results. All services are subject to applicable law, provider judgment, third-party platform performance, vendor availability, and written agreements.

12. Administrative Support Only

Enhanced Bioscience Consulting may assist with non-clinical tasks such as website coordination, patient engagement workflows, provider acquisition, CRM operations, scheduling support, documentation coordination, partner/vendor communication, status tracking, support routing, and retention workflows. These services do not include practicing medicine, dispensing medication, compounding medication, distributing drug products, directing clinical care, or making prescribing decisions.

13. Contact

Questions regarding Enhanced Bioscience Consulting administrative services may be directed to info@enhancedbioscience.consulting. Medical questions, medication questions, adverse reactions, treatment questions, and clinical concerns should be directed to a licensed healthcare provider, pharmacist, or emergency medical service as appropriate.
